Lab 2-1. Create a New Repository

The screenshot shows a GitHub repository named 'temp-repo' by user 'xuxeong'. The repository is public and has no description, website, or topics provided. It shows a commit history with three entries: 'LICENSE' (Initial commit, 15 minutes ago), 'README.md' (Update README.md, 7 minutes ago), and 'xuxeong Update README.md' (9c6d165, 7 minutes ago, 2 commits). The README file is displayed, showing the title 'temp-repo' and the content 'I learned how to create a new repository.' The right sidebar shows the repository's statistics: 0 stars, 1 watching, and 0 forks. It also includes sections for 'Releases' (No releases published) and 'Packages' (No packages published).

Lab 2-2. Create Your Profile Repository

The screenshot shows a GitHub profile page for user 'xuxeong'. The profile includes a circular avatar with a teal and gray cross pattern, a bio 'Hi there 🙋 I am a college student learning about software.', and a 'Join last week' status. The 'Popular repositories' section lists three repositories: 'learning-github' (Repository to learn Introduction to GitHub), 'temp-repo' (Repository to learn Introduction to GitHub), and 'xuxeong' (My profile repository). All repositories are public.
